## Skirting boards:

Skirting boards are an important part of the floor finish. They give character, but they also fulfil many functions. They are simple to assemble and protect against damage or flooding. From the very beginning of our existence, the aim of our company was to produce high quality products that would be available at an affordable price. To achieve this, it is necessary to use innovative technologies. It is for this reason that we have created a modern machine park.

FOGE skirting boards are more than just an aesthetic finish to your floor. They fulfil various functions. They offer protection from damage and affect the proportions and the atmosphere in the room. They also serve as a masking element for cables.
